The choice is clear.

The choice for Virginia.

Get the facts from the League of Conservation Voters.

Tim Kaine's
jobs plan

**George Allen's
jobs plan**

Get the facts.

Tim Kaine invests in clean energy.

George Allen would clean out our factories.

Too many factories in America sit empty. Too many people in Virginia are out of work. And George Allen has helped send jobs overseas, cleaning out Virginia factories and job sites.

Allen voted for \$39 billion in tax breaks for companies that export jobs to countries like China.¹

He even supported legislation that makes it easier to outsource jobs—including good paying clean energy jobs—to China.

And he's opposed key renewable energy tax incentives that ensure American workers—not Chinese workers—are hired to build clean energy equipment that powers America.²

He co-sponsored an amendment that would gut wind tax credits that keep clean energy jobs in the United States, and now wants to end them completely. Even one of Allen's fellow Republicans said that, without the tax credit, China is poised "to capture the entire industry."³

Tim Kaine or George Allen. On job creation—a world of difference.

Tim Kaine

Supports eliminating tax breaks for companies that ship American jobs overseas, including clean energy jobs.

Supports cracking down on China's unfair trade practices, including currency manipulation, that cost America jobs in clean energy and other sectors.

A proven job creator—here in America, here in Virginia. Under Kaine, Forbes named Virginia "Best for Business" for four consecutive years.

George Allen

Voted to give \$39 billion in tax breaks to companies that export jobs.

Co-sponsored a measure to gut wind tax credits and now wants to end them completely. Even Republicans say this could enable China to capture the entire industry.

Said he supported giving China permanent access to U.S. markets, which led to thousands of American clean energy jobs moving overseas.
