he nonprofit League of Conservation Voters (LCV) has published a *National Environmental Scorecard* every Congress since 1970, the year it was founded by leaders of the environmental movement following the first Earth Day. LCV believes our earth is worth fighting for because everyone has a right to clean air, water, lands and a safe, healthy community.

This edition of the *National Environmental Scorecard* provides objective, factual information about the most important environmental legislation considered and the corresponding voting records of all members of the first session of the 116th Congress. This *Scorecard* represents the consensus of experts from about 20 respected environmental and conservation organizations who selected the key votes on which members of Congress should be scored. LCV scores votes on the most important issues of the year, including energy, climate change, public health, public lands and wildlife conservation, and spending for environmental programs. The votes included in this Scorecard presented members of Congress with a real choice and help distinguish which legislators are working for environmental protection. Except in rare circumstances, the *Scorecard* excludes consensus action on the environment and issues on which no recorded votes occurred.

Dedicated environmentalists and national leaders volunteered their time to identify and research crucial votes. We extend special thanks to our Board of Directors, Issues & Accountability Committee, and Scorecard Advisory Committee for their valuable input. We also thank Sam Bleicher, whose generous support is making possible the widespread distribution of the Scorecard.

2019 OVERVIEW

What a difference a year makes. After eight long years of climate change deniers running the show in the U.S. House of Representatives, the 2019 *National Environmental Scorecard* reflects that Speaker Pelosi (D-CA) and the new pro-environment majority wasted no time passing legislation to protect our air, water, lands and wildlife and to combat the climate crisis.

At the beginning of 2019, Speaker Pelosi announced that Congresswoman Kathy Castor (D-FL) would lead the new Select Committee on the Climate Crisis, which has led on the more than 120 hearings on climate change the House conducted throughout the year. Furthermore, among the first ten bills of honor, the House introduced and passed a climate bill and two democracy reforms, all of which are critical to our efforts to address the climate crisis. H.R. 9, the Climate Action Now Act, ensures that the Trump administration cannot withdraw from the Paris Climate Agreement, while H.R. 1, the For the People Act, and H.R. 4, the Voting Rights Advancement Act, ensure that all people in this country can equitably participate in our democracy—an undeniably necessary step for protecting our environment and public health in a time when fossil fuel companies are spending excessive amounts to defend their ability to keep polluting.

Over the course of the year, the House passed a diverse set of pro-environment measures. When it comes to public lands, 2019 started on a high note with the enactment of the John D. Dingell, Jr. Conservation, Management, and Recreation Act, a package of public lands bills that permanently reauthorized the Land and Water Conservation Fund (LWCF) and protected over two million acres of public lands and waters. Throughout 2019, the House also passed important bills to protect the Atlantic and Pacific coasts and the eastern Gulf of Mexico from offshore drilling, to restore protections

for the pristine and culturally vital Arctic Refuge, and to conserve treasured public lands throughout the west. They also took badly needed steps to protect our air and water from PFAS chemical contamination. And, of course, the House began much needed and long overdue oversight, accountability, and efforts to block the myriad Trump rollbacks of environmental and public health protections.

Even as the House began to make this profoundly needed progress, as reflected by the majority of the 29 votes included in the Scorecard, devastating impacts of the climate crisis continued to worsen across the globe. In the United States, that included destructive flooding in the Midwest, deadly fires and droughts continuing in the West, and more intense hurricanes along the East Coast. Around the globe, the world bore witness to the horrific fires in Australia, the melting of the Arctic permafrost, and the record temperatures in Antarctica. Once again, it is the frontline communities and communities of color, which have already been disproportionately impacted by decades of exposure to toxic pollution, that continue to bear the brunt of the climate crisis.

In more bad news, 2019 was the second hottest year on record, making 18 of the last 19 the hottest ever. And the on the heels of the 2018 IPCC bombshell report that found we have just 12 years to stave off utter catastrophe, several more reports in 2019 reinforced the urgent need to dramatically

reduce greenhouse gas emissions, including the disastrous toll that the climate crisis is taking on our oceans.

While it's clear that the stakes for our environment and our health have never been higher, that seemed to matter not one bit to the Trump administration or Senate Majority Leader Mitch McConnell, both of whom continued to cater to polluters at every opportunity throughout 2019. Senator McConnell refused to act on hundreds of important House-passed bills, including many pro-environment measures found in the 2019 *Scorecard*, and instead has let them languish in his ever-growing legislative graveyard.

Making matters dramatically worse, at the same time as McConnell blocked important legislation, he worked with the Trump Administration to reshape the federal judiciary in ways that will haunt us for decades, confirming an extremely large number of very conservative judges to lifetime appointments. Additionally, McConnell led the Senate in confirming Andrew Wheeler to be administrator of the Environmental Protection Agency and David Bernhardt to be Secretary of the Interior, despite both serving as former industry lobbyists who pushed proposals at odds with the mission of the agencies they now run. For the third year in a row, the Senate Scorecard votes are dominated—8 of 14—by extreme, partisan nominees to both the federal bench and cabinet and sub-cabinet positions in the Trump administration.

Time and again, it was encouraging to see the proenvironment majority in the House pass so many bills to protect the environment and public health, and it was extremely disappointing to see that progress languish in the Senate. But, in stark contrast with the Republican leadership in the Senate, Democratic Leader Schumer encouraged his caucus to prioritize the climate crisis more than ever,

New In 2019 Scorecard

In order to better align our *Scorecard* with our organizational focus on equity across gender, race, family and health status, age, and physical ability and to more accurately represent a member of Congress's commitment to the environment, we are changing the way we score some missed votes. Starting in the 2019 *Scorecard*, votes missed by members of Congress due to family and medical leave or disasters are being treated as excused absences and will not count against a member's score. Votes missed for other reasons, including running for elected office, would still display as a missed vote and be counted the same as casting an anti-environmental vote, as they have for decades.

For the first time, we will be displaying the votes of the five House Delegates representing American Samoa, District of Columbia, Guam, Northern Mariana Islands, and U.S. Virgin Islands and the Resident Commissioner representing Puerto Rico. At the start of the 116th Congress, Democrats, as they have every time they have been in the majority since 1993, reinstated voting on the floor by these members when the House meets in the Committee of the Whole. Although the more than 4 million residents of the federal district and these territories lack full voting representation in Congress, we made this change as part of our organizational focus on racial justice and equity and those communities of color bearing the brunt of climate change's effects. In the past three years, major category 4+ hurricanes or cyclones have struck all of the island territories, and the District of Columbia is also at risk from extreme weather events and tidal flooding. We hope that the presence in the Scorecard of these representatives will remind readers of the need for greater representation and rights of these communities in our democracy.

with the vast majority of Senate Democrats signing on as original cosponsors of S. 1743, the International Climate Accountability Act, Senator Jeanne Shaheen's (D-NH) bill to block the Trump administration from leaving the Paris Climate Agreement and, when it came time to vote on blocking the Trump administration's repeal of the Clean Power Plan, most Senate Democrats made the pro-environment choice. Senate Democrats also created the Special Committee on the Climate Crisis and took to the Senate floor early and often throughout 2019 to call attention to the need for climate action.

Unfortunately, 2019 ended on a particularly disappointing note with the failure of the FY2020 appropriations package to extend and expand clean energy and electric vehicle tax incentives; protect the drinking water of communities poisoned by toxic PFAS chemicals; and provide full, permanent funding for the Land and Water Conservation Fund. In addition, the United States-Mexico-Canada Agreement (USMCA) trade bill didn't even mention the words "climate change" or include any provisions to address it.

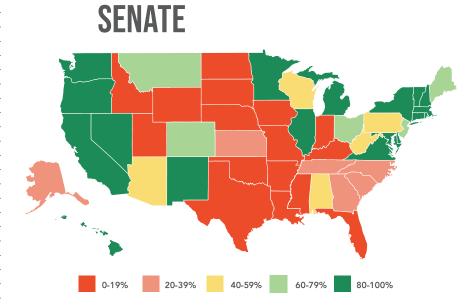

These failures make clear, once again, that to get good legislation enacted—the kind of legislation that originated in the House all year—a pro-environment majority in the Senate is necessary. We need to look no further than the historic progress in the states in 2019 to see what can be accomplished when environmental leaders are in power. Twelve states have

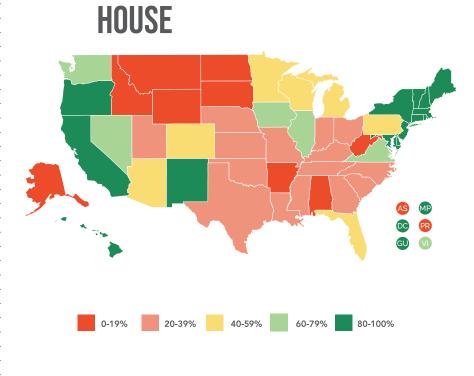

enacted major clean energy policies since many new pro-environment governors and state legislators assumed office in early 2019. As a result, 1 in 4 people now live in a place committed to 100 percent clean energy. In addition, six new governors joined the U.S. Climate Alliance, a coalition of 24 bipartisan governors committed to the goals of the Paris Climate Agreement.

It is clear that the states are leading the way and that the federal government must follow. Fortunately, many of the members of Congress who are included in this Scorecard for the first time are determined to ensure that Congress does just that. These are members who ran for Congress in 2018 because they cared so deeply about these issues, and they have led on them since day one in office. In fact, the average 2019 score of the new members who defeated members of LCV's 2018 Dirty Dozen is 95 percent while the average lifetime score of the members they defeated is 6 percent. LCV is eager to continue working with these environmental champions and so many others across the House and Senate in 2020 and beyond to deliver the environmental and public health results that communities across this country want and deserve.

2019 SENATE VOTE DESCRIPTIONS

1. STOPPING BORDER WALL FUNDING

Senate Democratic Leader Charles Schumer (D-NY) offered an amendment to H.R. 268, which would have reopened and funded the federal government during the Trump shutdown without funding the environmentally destructive and xenophobic border wall. The border wall threatens communities living along our southern border, has far ranging negative impacts on our lands, wildlife and waterways, and circumvents bedrock environmental laws. The Schumer amendment stood in stark contrast to one offered by Senate Majority Leader Mitch McConnell (R-KY) that would have provided \$5.7 billion for the damaging border wall and waived 36 environmental and cultural laws for its construction. On January 24, the Senate rejected the Schumer amendment by a vote of 52-44 (60 votes were needed for passage; Senate roll call vote 10). YES IS THE PRO-ENVIRONMENT VOTE. A different bill (H.J. Res. 31) was approved by Congress and signed by the President on February 15, which funded the government for the rest of fiscal year 2019 and included nearly \$1.4 billion for fencing along the border.

2. BLOCKING PERMANENT REAUTHORIZATION OF THE LAND & WATER CONSERVATION FUND

Senator Mike Lee (R-UT) offered an amendment to S. 47, the John D. Dingell, Jr. Conservation, Management, and Recreation Act, an amendment which would undermine the Land and Water Conservation Fund (LWCF) by limiting its reauthorization in this package of public lands bills. The underlying legislation permanently reauthorized LWCF, but this amendment would have limited it to a temporary five-year reauthorization. From 2015 to 2018, LWCF's authorization expired twice, putting in jeopardy this critical conservation program, which has protected National Parks and other federal lands, neighborhood parks, and historical sites in nearly every county in America. On February 7, Senator Lisa Murkowski (R-AK) offered a motion to table the Lee amendment, which the Senate approved by a vote of 68-30 (Senate roll call vote 19). YES IS THE PRO-ENVIRONMENT VOTE. The Senate and House subsequently passed S. 47 and the president signed this legislation into law on March 12, which permanently reauthorized LWCF.

3. UNDERMINING THE ANTIQUITIES ACT

Senator Mike Lee (R-UT) offered an amendment to S. 47, the John D. Dingell, Jr. Conservation, Management, and Recreation Act, an amendment which would limit the president's authority to protect national monuments. This amendment would weaken the Antiquities Act by restricting the president from designating new national monuments in the state of Utah. The Antiquities Act, which has been used by 17 presidents of both parties, has provided initial protections for nearly half of our national parks, including Grand Canyon and Acadia National Parks. Presidents need this authority to continue to act swiftly to protect irreplaceable natural, cultural, and historical sites on our public lands, especially in the face of threats to these magnificent places. On February 11, Senator Lisa Murkowski (R-AK) offered a motion to table the Lee amendment, which the Senate approved by a vote of 60-30 (Senate roll call vote 20). YES IS THE PRO-ENVIRONMENT VOTE.

4. PUBLIC LANDS PACKAGE

Senator Lisa Murkowski (R-AK) sponsored S. 47, the John D. Dingell, Jr. Conservation, Management, and Recreation Act, a package of public lands bills that permanently reauthorized the Land and Water Conservation Fund (LWCF) and protected over two million acres of public lands and

waters, among other provisions. LWCF is the nation's best and most accessible parks program and has benefitted every region and nearly every county in the country by funding projects that range from increasing access to national parks to creating local parks. In addition to the LWCF provisions, S. 47 also included more than 100 local and regional land protection bills, including legislation to designate wilderness areas and other protections, as well as the Every Kid Outdoors Act, which provides free access to our nation's public lands and waters for fourth graders and their families. While not every provision in the package benefitted conservation, overall, this legislation advanced public lands and waters protections. On February 12, the Senate approved S. 47 by a vote of 92-8 (Senate roll call vote 22). **YES IS THE PRO-ENVIRONMENT VOTE**. The House approved S. 47 on February 26 and the president signed this legislation into law on March 12.

5. MILLER CONFIRMATION (NINTH CIRCUIT COURT OF APPEALS)

The Senate considered President Trump's nomination of Eric Miller to be a U.S. Circuit Court judge for the Ninth Circuit. Circuit courts are often the ultimate arbiters of highly significant cases, including those involving environmental protections, and it is critical that the judges confirmed to serve lifetime appointments on these courts are qualified, non-partisan, and committed to treating parties fairly. In particular, the Ninth Circuit is critically important for environmental issues, covering nearly two-thirds of the nation's public land and over half of all endangered species. LCV is committed to furthering racial justice and equity, and Miller has repeatedly challenged tribal rights, recognition and sovereignty, including through pro bono representation. We share the concerns of the National Council of American Indians and the Native American Rights Fund, who strongly opposed Miller's nomination and questioned his ability to rule fairly on cases involving tribal issues. Moreover, Miller's record, including his writings and public statements, reflect a view of the legal system as a tool to protect corporations, rather than the public interest. On February 26, the Senate confirmed Miller to the Ninth Circuit by a vote of 53-46 (Senate roll call vote 29). NO IS THE PRO-ENVIRONMENT VOTE.

6. WHEELER CONFIRMATION (EPA ADMINISTRATOR)

The Senate considered President Trump's nomination of Andrew Wheeler for administrator of the Environmental Protection Agency (EPA). The mission of the EPA is to protect human health and the environment, but Wheeler has dedicated his career to weakening environmental protections—he served as a lobbyist for numerous fossil fuel clients, including one of our country's biggest polluters, Murray Energy. Wheeler's inherent conflicts of interest, which stem from his long history of ties to the fossil fuel industry, and actions to undermine public health and environmental safeguards as deputy administrator of the EPA made him an entirely inappropriate choice for leading the agency. On February 28, the Senate confirmed Wheeler to be administrator of the EPA by a vote of 52-47 (Senate roll call vote 33). NO IS THE PRO-ENVIRONMENT VOTE.

7. RAO CONFIRMATION (D.C. CIRCUIT COURT OF APPEALS)

The Senate considered President Trump's nomination of Neomi Rao to be a U.S. Circuit Court judge for the D.C. Circuit. Circuit courts are often the ultimate arbiters of highly significant cases, including those involving environmental protections, and it is critical that the judges confirmed to serve lifetime appointments on these courts are qualified, non-partisan, and committed to treating parties fairly. As administrator of the Office of Information and Regulatory Affairs

(OIRA), Rao led efforts to roll back fundamental environmental protections and misuse the regulatory review process for partisan political purposes. Rao spent the past 20 years arguing against environmental and other public protections, disparaging efforts to keep our air and water clean as unnecessary burdens on corporate freedom, and even referring to the greenhouse effect as a "controversial theory." Her long record on this issue, as well as her offensive and demeaning writings on sexual assault, race, and LGBTQ rights made it clear that she is incapable of serving fairly as a federal judge. On March 13, the Senate confirmed Rao to the D.C. Circuit by a vote of 53-46 (Senate roll call vote 44). NO IS THE PRO-ENVIRONMENT VOTE.

8. WYRICK CONFIRMATION (DISTRICT COURT FOR WESTERN DISTRICT OF OKLAHOMA)

The Senate considered President Trump's nomination of Patrick Wyrick to be a U.S. District Court judge for the Western District of Oklahoma. It is critical that the judges confirmed to serve lifetime appointments on our federal courts are qualified, non-partisan, and committed to treating parties fairly. As Solicitor General for Oklahoma, Wyrick was former Oklahoma Attorney General and EPA Administrator Scott Pruitt's "dear friend and trusted counselor"—they worked together on multiple cases that challenged the EPA's ability to protect public lands and clean air and address climate change. Wyrick's record also raised serious ethical concerns. He made several inaccurate statements to the Senate Judiciary Committee, including about his involvement in his wife's business, his conflicts with oil and gas companies, and his false statements before the U.S. Supreme Court. On April 9, the Senate confirmed Wyrick to the Western District of Oklahoma by a vote of 53-47 (Senate roll call vote 68). NO IS THE PRO-ENVIRONMENT VOTE.

9. BERNHARDT CONFIRMATION (INTERIOR SECRETARY)

The Senate considered President Trump's nomination of David Bernhardt to serve as the secretary of the Department of the Interior (DOI). This position is critical to protecting our natural resources for future generations, but Bernhardt's confirmation put our public lands and oceans, national parks and monuments, clean air and water, and wildlife at risk. With his long history of lobbying for the very industries under the Department of the Interior's purview—creating numerous conflicts of interest—and his proximity to ethics scandals during his roles as acting Interior secretary and deputy secretary, it is clear Bernhardt has not put the public interest first. Bernhardt was the architect of some of the Trump administration's most destructive natural resource policies, including overseeing the largest elimination of protected public lands and waters in U.S. history through President Trump's unprecedented attempt to rescind two million acres of Bears Ears and Grand Staircase-Escalante National Monuments, a radical expansion of offshore drilling, and the fast-tracking of efforts to drill in the pristine and sacred Arctic National Wildlife Refuge. On April 11, the Senate confirmed Bernhardt to be secretary of the Department of the Interior by a vote of 56-41 (Senate roll call vote 77). NO IS THE PRO-ENVIRONMENT VOTE.

10. JORJANI CONFIRMATION (INTERIOR SOLICITOR)

The Senate considered President Trump's nomination of Daniel Jorjani to serve as the solicitor of the Department of the Interior (DOI). This position is the top lawyer for DOI, and is the bottom line on legal issues and ethics for the department. Before joining DOI, Jorjani held several positions with groups funded by the well-known oil magnates, the Koch brothers. Pri-

or to his confirmation, Jorjani served as Interior's Principal Deputy Solicitor and was responsible for providing legal guidance for some of the Interior Department's most egregious decisions in support of Trump's "energy dominance" agenda. Time and again his legal opinions benefitted oil, gas, mining or extractive interests at the expense of conservation and public health. Jorjani has also demonstrated an aversion to transparency, including restricting Freedom of Information Act responses and justifying Interior Secretary Bernhardt's troubling practice of not maintaining a calendar, which made it harder for the public to know with whom he has been meeting. Jorjani's ties to the fossil fuel industry and efforts to hinder transparency within the Department put him at odds with the core mission of the office of the solicitor. On September 24, the Senate confirmed Jorjani to be the solicitor of the Department of the Interior by a vote of 51-43 (Senate roll call vote 300). NO IS THE PRO-ENVIRONMENT VOTE.

11. SCALIA CONFIRMATION (LABOR SECRETARY)

The Senate considered President Trump's nomination of Eugene Scalia to serve as the secretary of the Department of Labor (DOL). This position is critical to protecting labor rights and the safety of our workers as we transition to a clean energy economy, but Scalia's confirmation puts workers and our communities at risk. He has a long history of working on behalf of corporate interests who have fought health and safety standards, including representing Big Oil's fight against refinery safety regulations following catastrophic refinery fires across the nation. Efforts to transition to a clean energy economy require strong labor protections to keep workers safe, ensure greater equity and establish family-sustaining jobs. Scalia's record starkly contrasts with these goals as well as the very mission of the Department of Labor. On September 26, the Senate confirmed Scalia to be secretary of the Department of Labor by a vote of 53-44 (Senate roll call vote 313). NO IS THE PRO-ENVIRONMENT VOTE.

12. STOPPING ROLLBACKS OF CARBON POLLUTION LIMITS FOR POWER PLANTS

Senator Ben Cardin (D-MD) sponsored S.J. Res. 53, the resolution of disapproval of the Trump administration EPA's Affordable Clean Energy rule. In addition to demonstrating the broad opposition to the rule, if enacted, the resolution would invalidate the rule. Trump's rule, more accurately titled the Dirty Power Scam, is part of a dangerous pattern of this administration ignoring science and favoring polluters over the public interest. This rule does nothing to fight climate change or protect communities from toxic pollution, and it lets fossil fuel-fired power plants off the hook to clean up their carbon pollution. The Dirty Power Scam would put no meaningful limits on carbon pollution, and, in fact, could lead to more pollution in many parts of the country than if there were no standard at all. On October 17, the Senate rejected S.J. Res. 53 by a vote of 41-53 (Senate roll call vote 324). YES IS THE PRO ENVIRONMENT VOTE.

13. UNDERMINING THE LAND AND WATER CONSERVATION FUND

Senator Mike Lee (R-UT) offered an amendment to H.R. 3055, the Commerce, Justice, Science, Agriculture, Rural Development, Food and Drug Administration, Interior, Environment, Military Construction, Veterans Affairs, Transportation, and Housing and Urban Development Appropriations Act, 2020, which would undermine the Land and Water Conservation Fund's (LWCF) core conservation mission by jeopardizing the program's ability to acquire lands for new or expanded

LWCF sites. LWCF secures vital public access to green spaces; protects wildlife and other irreplaceable resources; help agencies reduce costs and address ongoing management issues (such as invasive species and wildfires); and enhances outdoor recreation opportunities. The rejection of this amendment is a victory for our nation's best parks program and for all those who cherish our public lands. On October 31, the Senate rejected the Lee amendment by a vote of 29-64 (Senate roll call vote 339). **NO IS THE PRO-ENVIRONMENT VOTE**.

14. VANDYKE CONFIRMATION (NINTH CIRCUIT COURT OF APPEALS)

The Senate considered President Trump's nomination of Lawrence VanDyke to be a U.S. Circuit Court judge for the Ninth Circuit. Circuit courts are often the ultimate arbiters of highly significant cases, including those involving environmental protections, and it is critical that the judges confirmed to serve lifetime appointments on these courts are qualified, non-partisan, and committed to treating parties fairly. In particular, the Ninth Circuit is critically important for environmental issues, covering nearly two-thirds of the nation's public land and over half of all endangered species. VanDyke spent his career opposing environmental protections and supporting the expansion of oil and gas drilling on public lands. He joined with three mining companies in a lawsuit challenging bipartisan efforts to protect sage-grouse habitats, challenged the proposed Clean Water Rule, opposed the EPA's Clean Power Plan to address climate change, and opposed the protection of one million acres of Grand Canyon watershed from the harms of uranium mining. His long record on environmental issues, as well as significant concerns voiced by his colleagues about his qualifications to serve fairly as a judge make clear that he is incapable of objectively ruling on environmental matters. On December 11, the Senate confirmed VanDyke to the Ninth Circuit by a vote of 51-44 (Senate roll call vote 391). No IS THE PRO-ENVIRONMENT VOTE.

2019 HOUSE VOTE DESCRIPTIONS

1. STOPPING BORDER WALL FUNDING

House Appropriations Committee Chair Nita Lowey (D-NY) sponsored H.J. Res. 1, which would have reopened and funded the Department of Homeland Security during the Trump shutdown without funding the environmentally destructive and xenophobic border wall. The border wall threatens communities living along our southern border, has far ranging negative impacts on our lands, wildlife and waterways, and circumvents bedrock environmental laws. This bill was packaged with other bills to reopen and fund the federal government for the rest of the year. On January 3, the House approved H.J. Res. 1 by a vote of 239-192 (House roll call vote 9). **YES IS THE PRO-ENVIRONMENT VOTE**. The Senate took no action on this legislation, but a different bill (H.J. Res. 31) was approved by Congress and signed by the President on February 15, which funded the government for the rest of fiscal year 2019 and included nearly \$1.4 billion for fencing along the border.

2. PUBLIC LANDS PACKAGE

Senate Energy and Natural Resources Committee Chair Lisa Murkowski (R-AK) sponsored S. 47, the John D. Dingell, Jr. Conservation, Management, and Recreation Act, a package of public lands bills that permanently reauthorized the Land and Water Conservation Fund (LWCF) and protected over two million acres of public lands and waters, among other provisions. LWCF is the nation's best and most accessible parks program and has benefitted every region and nearly every county in the country by funding a wide scope of projects that range from increasing access to national parks to creating local parks. In addition to the LWCF provisions, S. 47 included more than 100 local and regional land protection bills, as well as the Every Kid Outdoors Act, which provides free access to our nation's public lands and waters for fourth graders and their families. While not every provision in the package benefitted conservation, overall, this legislation advanced public lands and waters protections. On February 26, the House approved S. 47 by a vote of 363-62 (House roll call vote 95). YES IS THE PRO-ENVIRONMENT VOTE. The Senate approved S. 47 on February 12 and the president signed this legislation into law on March 12.

3. PROTECTING OUR DEMOCRACY

Representative John Sarbanes (D-MD) sponsored H.R. 1, the For the People Act, a sweeping democracy reform bill that would address a range of threats to our democracy by expanding voting rights, strengthening ethics reforms, and reducing the influence of money in our elections. Everyone's right to be heard and counted in the political process is essential to the function of our democracy, and far too often it is people of color and frontline communities who are targeted by restrictive voting laws and partisan gerrymandering. By ensuring that voters have access to the ballot box and their voices are not drowned out by outsized corporate interests, the people will be better equipped to hold politicians accountable and accomplish meaningful climate action. On March 8, the House approved H.R. 1 by a vote of 234-193 (House roll call vote 118). YES IS THE PRO-ENVIRONMENT VOTE. The Senate took no action on this legislation.

4. RECOGNIZING THE NEED FOR CLIMATE JUSTICE

Representative Adriano Espaillat (D-NY) offered an amendment to H.R. 9, the Climate Action Now Act, which calls on the House to consider the impact of climate change on communities of color and disenfranchised communities when upholding our commitment to the Paris Climate

Agreement. Climate change hits low income communities and communities of color the hardest, and in the fight for climate action, it is critical that, at every step of the process, policies advance environmental justice for communities disproportionately suffering from the effects of climate change. This amendment would ensure environmental justice is actively incorporated into our country's strategy to uphold the Paris Climate Agreement. On May 2, the House approved the Espaillat amendment by a vote of 237-185 (House roll call vote 175). YES IS THE PRO- ENVIRONMENT VOTE. The House passed H.R. 9, with the Espaillat amendment attached, on May 2. The Senate took no action on this legislation.

5. ADDRESSING CLIMATE CHANGE'S DAMAGES

Representative Jeff Van Drew (R-NJ) offered an amendment to H.R. 9, the Climate Action Now Act, which stresses the importance of avoiding and reducing losses due to climate change and the need for sustainable development. Communities across the country are experiencing the devastating impacts of wildfires, earthquakes, hurricanes, flooding, and other weather events fueled by climate change. It is critical that these communities have adequate resources to prepare for and recover from such weather events, especially as they occur more frequently and their severity is exacerbated by climate change. On May 2, the House approved the Van Drew amendment by a vote of 257-167 (House roll call vote 181). YES IS THE PRO-ENVIRONMENT VOTE. The House passed H.R. 9, with the Van Drew amendment attached, on May 2. The Senate took no action on this legislation.

6. KEEPING AMERICA'S COMMITMENT TO THE PARIS CLIMATE AGREEMENT

House Select Committee on the Climate Crisis Chair Kathy Castor (D-FL) sponsored H.R. 9, the Climate Action Now Act, which would honor America's commitment to the Paris Climate Agreement, recognize the urgency of tackling climate change, and lay the groundwork for further climate action. Climate change is already having devastating impacts on communities across the country. More extreme storms, record-breaking floods, and raging wildfires are hurting our families and devastating communities, and these impacts and the burden of toxic pollution hit lower income, communities of color, and Indigenous peoples first and worst. H.R. 9 is a strong rebuke of the Trump administration's denial of the climate crisis, efforts to undermine progress, and the ill-conceived decision to become the only country in the world to reject the landmark Paris Climate Agreement. In response to this utter failure of leadership, governors, mayors, universities, businesses, faith leaders, and investors are stepping up to support climate action to meet this agreement. In 2019 alone, eight new governors have joined the U.S. Climate Alliance, bringing the total to 24 states committed to meeting the Paris Climate Agreement's goals. On May 2, the House approved H.R. 9 by a vote of 231-190 (House roll call vote 184). YES IS THE PRO-ENVIRONMENT VOTE. The Senate took no action on this legislation.

7. PROTECTING DREAMERS AND IMMIGRANTS FLEEING DISASTERS

Representative Lucille Roybal-Allard (D-CA) sponsored H.R. 6, the American Dream and Promise Act of 2019, which would provide permanent protections for Dreamers, Temporary Protected Status (TPS), and Deferred Enforced Departure (DED) holders who are living in limbo due to the Trump administration's decision to strip away their legal status. Dreamers, or adults who were brought to the U.S. without papers as children, are integral members of our communities and

make invaluable contributions to our society—including as LCV staff, members and volunteers. Many of the individuals who have qualified for TPS have come to the U.S. in the wake of natural disasters—including hurricanes and earthquakes—that have devastated their homelands and because of wars over diminishing natural resources, much of which is being driven by the growing climate crisis. And communities of color and immigrant communities face a higher rate of harm from exposure to toxic pollution, are often hit first and worst by climate change's impacts, and far too often are not able to participate equitably in our democracy. On June 4, the House passed H.R. 6 by a vote of 237-187 (House roll call 240). YES IS THE PRO-ENVIRONMENT VOTE. The Senate took no action on this legislation.

8. IGNORING THE COSTS OF CLIMATE CHANGE

Representative Markwayne Mullin (R-OK) offered an amendment to H.R. 2740, an appropriations bill funding various government agencies, which would have precluded federal agencies from considering the social cost of carbon in their rulemaking processes. The social cost of carbon is a monetary estimate of the damages caused by carbon pollution, or greenhouse gas emissions, contributing to climate change. Climate change is already having devastating impacts on communities across the country and the costs are piling up. More extreme storms, record-breaking floods, and raging wildfires are hurting our families and devastating communities, and these impacts and the burden of toxic pollution hit lower income, communities of color, and Indigenous peoples first and worst. This amendment would not allow the federal government to take into account the true cost of carbon dioxide and other greenhouse gas emissions, making it much more challenging to implement emissions limits or other policies that would help avert climate change. On June 19, the House rejected the Mullin amendment by a vote of 186-248 (House roll call vote 362). NO IS THE PRO-ENVIRONMENT VOTE.

9. BLOCKING THE DISASTROUS PEBBLE MINE

Representative Jared Huffman (D-CA) offered an amendment to H.R. 2740, an appropriations bill funding various government agencies, which would prohibit the U.S. Army Corps of Engineers from moving forward with finalizing the Environmental Impact Statement for Pebble Mine in Bristol Bay, Alaska and block development of the mine. This proposed gold and copper mine would wreak immense and irreversible harm on the waters of Bristol Bay, which contain the world's largest sockeye salmon fishery and most prolific king salmon run in the world. The Bristol Bay fishery forms the foundation of a robust and sustainable economy and the way of life of over 30 Alaskan Native communities who have relied on the watershed for generations, and it also serves as critical habitat for bears, eagles, wolves, and many other species. On June 19, the House approved the Huffman amendment by a vote of 233-201 (House roll call vote 363). YES IS THE PRO-ENVIRONMENT VOTE. The House passed H.R. 2740, including the Huffman amendment, on June 19. The Huffman amendment was not included in any appropriations bill that became law.

10. BOOSTING CLEAN ENERGY AND CLIMATE FUNDING

Representative Rosa DeLauro (D-CT) sponsored H.R. 2740, the Labor, Health and Human Services, Education, Defense, State, Foreign Operations, and Energy and Water Development Appropriations Act, 2020, which rejected the Trump administration's irresponsible budget cuts, blocked the Trump administration's withdrawal from the Paris Climate Agreement, increased investments

to fight climate change, and boosted clean energy. The Energy and Water division of H.R. 2740 rightly focused on using the federal government's resources to help fight climate change. The bill's significant increases for renewable energy, energy efficiency, and scientific research respond to rising concerns about climate change and support for action to address the crisis. On June 19, the House approved H.R. 2740 by a vote of 226-203 (House roll call vote 367). **YES IS THE PRO-ENVIRONMENT VOTE**. While the Senate rejected H.R. 2740 on October 31, some smaller funding increases for clean energy and to fight climate change were included in H.R. 1865, the Further Consolidated Appropriations Act, 2020, an omnibus appropriations bill that the president signed into law on December 20.

11. BLOCKING PROTECTIONS FOR ENDANGERED WHALES

Representative Jared Golden (D-ME) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would hinder the recovery of the critically endangered North Atlantic right whale. There are fewer than 420 of these majestic creatures left on earth, and they could be extinct within a few decades. At a time when action is desperately needed, this amendment would have prohibited the National Marine Fisheries Service from implementing science-based, consensus recommendations to save the North Atlantic right whale. On June 20, the House rejected the Golden amendment by a vote of 84-345 (House roll call vote 372). NO IS THE PRO-ENVIRONMENT VOTE.

12. STOPPING CARBON POLLUTION LIMITS FOR POWER PLANTS

Representative Jeff Duncan (R-SC) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would have stopped enforcement of the Clean Power Plan, thus attacking carbon pollution standards for existing power plants and new power plants. Climate change is already having devastating impacts on communities across the country. More extreme storms, record-breaking floods, and raging wildfires are hurting our families and devastating communities, and these impacts and the burden of toxic pollution hit lower income, communities of color, and Indigenous peoples first and worst. On June 20, the House rejected the Duncan amendment by a vote of 192-240 (House roll call vote 381). NO IS THE PRO-ENVIRON-MENT VOTE.

13. BLOCKING LOGGING IN THE TONGASS NATIONAL FOREST

Representative Earl Blumenauer (D-OR) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would halt the Trump administration's attempt to open up Alaska's majestic Tongass National Forest to private logging by disallowing roads to be built using taxpayer dollars in the old-growth wilderness. For decades, the timber industry has quietly benefited from hundreds of millions of dollars in taxpayer subsidies, much of which has covered costs associated with building logging roads in the Tongass National Forest that serve no other public purpose. On June 20, the House approved the Blumenauer amendment by a vote of 243-188 (House roll call vote 382). YES IS THE PRO-ENVIRONMENT VOTE. The House passed H.R. 3055, with the Blumenauer amendment attached, on June 25. The Blumenauer amendment was not included in any appropriations bills that became law.

14. BLOCKING THE EPA FROM REDUCING CARBON POLLUTION

Representative Paul Gosar (R-AZ) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would have prohibited the EPA from recognizing the health and environmental dangers of carbon dioxide and blocked implementation of standards to reduce carbon pollution. Climate change is already having devastating impacts on communities across the country and the costs are piling up. More extreme storms, record-breaking floods, and raging wildfires are hurting our families and devastating communities, and these impacts and the burden of toxic pollution hit lower income, communities of color, and Indigenous peoples first and worst. On June 20, the House rejected the Gosar amendment by a vote of 178-254 (House roll call vote 383). NO IS THE PRO-ENVIRONMENT VOTE.

15. HALTING OIL DRILLING IN THE ARCTIC REFUGE

Representative Jeff Duncan (R-SC) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would have struck a provision in the underlying bill that effectively blocked oil and gas lease sales in the Arctic National Wildlife Refuge by ensuring that the sales could not go forward unless they raised the large sums of revenues promised in the 2017 tax legislation that mandated those lease sales. Based on revenues generated by lease sales in lands adjacent to the Arctic Refuge, it is extremely unlikely that Arctic Refuge sales could generate the revenues promised, effectively blocking the sales from happening. Drilling in the Arctic Refuge would do irreparable damage to one of America's most magnificent and wildest landscapes, which is home to polar and brown bears, muskoxen, and birds that migrate from all 50 states and six continents. The indigenous Gwich'in people call the Arctic Refuge's coastal plain "the sacred place where life begins," in part because the Porcupine Caribou Herd calves in the area and the Gwich'in rely on these caribou for subsistence food and their spiritual needs. On June 20, the House rejected the Duncan amendment by a vote of 198-233 (House roll call vote 384). NO IS THE PRO-ENVIRONMENT VOTE.

16. METHANE POLLUTION SAFEGUARDS

Representative Markwayne Mullin (R-OK) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would have prevented the Environmental Protection Agency (EPA) from implementing standards to reduce methane pollution from new and modified sources in the oil and gas industry. The EPA's methane pollution rule would have required compliance with low-cost, proven safeguards that are critical to reducing methane's contributions to climate change. The climate benefits were estimated to reach \$170 million by 2025 while also curbing toxic air pollutants that contribute to smog and jeopardize the health of nearby communities, particularly the health of low income communities, communities of color, and Indigenous peoples who already bear a disproportionate burden of pollution. On June 20, the House rejected the Mullin amendment by a vote of 191-241 (House roll call vote 385). **NO IS THE PRO-ENVIRONMENT VOTE**.

17. ELIMINATING EPA'S CHEMICAL HAZARD ASSESSMENT PROGRAM, IRIS

Representative Andy Biggs (R-AZ) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would have eliminated funding for the Environmental Protection Agency's (EPA's) program that evaluates the health and environmental hazards of chemicals, known as the Integrated Risk Information System (IRIS). The EPA and state and local agencies rely on this program to help determine air and water pollution limits, waste site cleanup standards, and other risk levels and regulatory actions. On June 20, the House rejected the Biggs amendment by a vote of 157-275 (House roll call vote 390). NO IS THE PRO-ENVIRONMENT VOTE.

18. PRESERVING THE MERCURY & AIR TOXICS STANDARDS

Representative Kim Schrier (D-WA) offered an amendment to H.R. 3055, an appropriations bill funding various government agencies, which would halt the Trump administration's attempt to undermine the Mercury and Air Toxics Standards—critical safeguards that protect our children from mercury and other toxic pollution spewed into our air by dirty power plants. When ingested, mercury is a powerful neurotoxin known to cause permanent damage to developing brains and can lead to developmental delays, learning disabilities, and birth defects. And power plants are one of the largest contributors to mercury pollution in the environment and the fish we eat. On June 20, the House approved the Schrier amendment by a vote of 253-177 (House roll call vote 395). YES IS THE PRO-ENVIRONMENT VOTE. The House passed H.R. 3055, with the Schrier amendment attached, on June 25. The Schrier amendment was not included in any appropriations bills that became law.

19. PRO-ENVIRONMENT FUNDING BILL

Representative José Serrano (D-NY) sponsored H.R. 3055, the Commerce, Justice, Science, Agriculture, Rural Development, Food and Drug Administration, Interior, Environment, Military Construction, Veterans Affairs, Transportation, and Housing and Urban Development Appropriations Act, 2020, which rejected the Trump administration's irresponsible budget cuts and instead increased investments to fight climate change, protect communities from toxic pollution, safeguard our lands and waters, cut air pollution, and boost clean energy. The investments in this bill would help protect kids' health and grow our outdoor recreation economy. H.R. 3055 increased funding for the Environmental Protection Agency to specifically address environmental justice and for our land management agencies, such as the National Park Service and the Fish and Wildlife Service, to improve our parks and wildlife refuges. H.R. 3055 is a strong rebuke of the Trump administration's denial of the climate crisis, efforts to undermine environmental progress, and promotion of polluters over people. On June 25, the House approved H.R. 3055 by a vote of 227-194 (House roll call vote 408). YES IS THE PRO-ENVIRONMENT VOTE. H.R. 3055 became law after it was stripped of its substantive provisions and became a stopgap funding bill. H.R. 1865, the Further Consolidated Appropriations Act, 2020, the omnibus appropriations bill that the president signed into law on December 20, rejected the draconian cuts originally proposed by the Trump administration and included some spending increases for environmental programs.

20. STOPPING FUTURE DRILLING IN THE EASTERN GULF OF MEXICO

Representatives Francis Rooney (R-FL) and Kathy Castor (D-FL) sponsored H.R. 205, the Protecting and Securing Florida's Coastline Act of 2019, a bipartisan bill that would permanently extend the moratorium on offshore drilling on the Florida Gulf Coast, which is set to expire in 2022. It also includes an amendment reinstating Obama-era rules requiring stricter safety standards on offshore drilling rigs. This legislation would protect the clean and healthy coasts and marine ecosystems that are vital to Florida's economy and coastal communities. On September 11, the House approved H.R. 205 by a vote of 248–180 (House roll call vote 521). YES IS THE PROENVIRONMENT VOTE. The Senate took no action on this legislation.

21. BANNING OFFSHORE DRILLING IN THE ATLANTIC AND PACIFIC OCEANS

Representative Joe Cunningham (D-SC) sponsored H.R. 1941, the Coastal and Marine Economies Protection Act, which would prohibit drilling off the Atlantic and Pacific coasts. The bill also included amendments establishing a moratorium on seismic blasting off the Atlantic coast and authorizing studies on the impacts of offshore drilling on coastal communities, including the economic risks to tourism, fishing, boating, and other activities. This bill would protect coastal communities and marine wildlife from the devastating effects of oil spills that can wreck entire economies and ecosystems. On September 11, the House approved H.R. 1941 by a vote of 238–189 (House roll call vote 525). **YES IS THE PRO-ENVIRONMENT VOTE**. The Senate took no action on this legislation.

22. RESTORING PROTECTIONS FOR THE ARCTIC REFUGE

Representative Jared Huffman (D-CA) sponsored H.R. 1146, the Arctic Cultural and Coastal Plain Protection Act, which would reverse a 2017 tax bill provision that mandated the sale of oil and gas leases in the Coastal Plain of the Arctic National Wildlife Refuge. The Coastal Plain is considered the cultural and biological heart of the Arctic Refuge: it is home to majestic wildlife such as Porcupine Caribou (the Gwich'in people's sacred animal), polar bears, and muskoxen. This bill is a major victory for Gwich'in rights and the preservation of one of the wildest and most pristine areas in our country. On September 12, the House approved H.R. 1146 by a vote of 225–193 (House roll call vote 530). **YES IS THE PRO-ENVIRONMENT VOTE**. The Senate took no action on this legislation.

23. PROTECTING CHACO CANYON FROM OIL AND GAS DEVELOPMENT

Representative Ben Ray Lujan (D-NM) sponsored H.R. 2181, the Chaco Cultural Heritage Area Protection Act of 2019, which would establish a 10-mile buffer zone from oil and gas development around Chaco Culture National Historical Park (Chaco Canyon). Chaco Canyon is a UNESCO World Heritage Site, home to ancient indigenous structures and artifacts sacred to many tribes including the Pueblo people. In the past decade, Indigenous communities and leaders in New Mexico and Arizona have been concerned about the encroachment of oil and gas drilling to Chaco Canyon and the possible destruction of ancestral structures these activities could cause. The passage of this bill is a major victory for the Pueblo people who have tirelessly fought for their sacred and ancestral lands and for our country's cultural heritage. On October 30, the House approved H.R. 2181 by a vote of 245–174 (House roll call vote 597). YES IS THE PRO-ENVIRONMENT VOTE. The Senate took no action on this legislation.

24. PROTECTING THE GRAND CANYON FROM TOXIC URANIUM MINING

House Natural Resources Chairman Raúl Grijalva (D-AZ) sponsored H.R. 1373, the Grand Canyon Centennial Protection Act, which would permanently ban mineral extraction in 1 million acres around Grand Canyon National Park. The Grand Canyon is one of our country's most iconic landscapes and the ancestral home to the Havasupai, Hualapai, Hopi, and the Navajo, who have protected this sacred land for hundreds of years and continue to rely on this land for sustenance and safe drinking water. This bill is a major victory for the Indigenous communities who have fought tirelessly to protect their ancestral lands; for all of those impacted by the toxic legacy of decades of uranium mining in the region; for the lands, water, and ecosystems of the Grand Canyon; and for our country's natural and cultural heritage. On October 30, the House approved H.R. 1373 by a vote of 236–185 (House roll call vote 602). YES IS THE PRO-ENVIRONMENT VOTE. The Senate took no action on this legislation.

25. PROTECTING COLORADO'S PUBLIC LANDS

Representative Joe Neguse (D-CO) sponsored H.R. 823, the Colorado Outdoor Recreation and Economy Act (CORE Act), which would establish new wilderness, conservation, and recreation sites in Colorado for future generations to enjoy. This bill would protect 400,000 acres of public land in the state by withdrawing 200,000 acres from future oil and gas development and establishing new wilderness and conservation areas with diverse opportunities for the recreation economy. This vote is a victory for our country's natural and cultural heritage, our public lands and waters, and the outdoor recreation economy. On October 31, the House approved H.R. 823 by a vote of 227–182 (House roll call vote 609). **YES IS THE PRO-ENVIRONMENT VOTE**. The Senate took no action on this legislation.

26. SHARK FINNING BAN

Congressman Gregorio Kilili Camacho Sablan (D-MP) sponsored H.R. 737, the Shark Fin Sales Elimination Act of 2019, which would end all imports, exports, trade, distribution, and possession for commercial purposes of shark fins and products containing shark fins in the United States and impose a fine of up to \$100,000 for violations. The passage of this bill is a victory for the protection of sharks and our marine ecosystems. On November 20, the House approved H.R. 737 by a vote of 310-107 (House roll call vote 634). **YES IS THE PRO-ENVIRONMENT VOTE**. The Senate took no action on this legislation.

27. PROTECTING THE RIGHT TO VOTE

Representative Terri Sewell (D-AL) sponsored H.R. 4, the Voting Rights Advancement Act, which would amend the Voting Rights Act of 1965 to strengthen the voting rights protections that the Supreme Court struck down in the 2013 case *Shelby County v. Holder*. Notably, H.R. 4 reestablishes "preclearance," which requires states and jurisdictions with a history of voter discrimination to obtain federal approval before changing voting rules. Since the Supreme Court struck down the previous preclearance formula, 22 states have enacted restrictive voting rules, including many with a history of voter discrimination. H.R. 4 would also increase public notice for changes to voting rules and bolster voting protections for Indigenous people. On December 6, the House approved H.R. 4 by a vote of 228-187 (House roll call vote 654). **YES IS THE PRO-ENVIRONMENT VOTE**. The Senate took no action on this legislation.

28. ATTACK ON MARINE MAMMAL PROTECTIONS FROM HARMFUL AIR GUN BLASTING

Representative Mike Johnson (R-LA) offered an amendment to H.R. 729, the Coastal and Great Lakes Communities Enhancement Act, which would have introduced the text of the Streamlining Environmental Approvals Act (SEA Act) into the bill. The SEA Act would gut core provisions of the Marine Mammal Protection Act and fast-track harmful seismic airgun blasting, a method for surveying oil and gas deposits in the ocean that produces noise at such high volume that marine mammals may be disturbed, injured, or killed. The rejection of this amendment is a victory for protections for marine mammals and biodiversity. On December 10, the House rejected the Johnson amendment by a vote of 160-259 (House roll call vote 666). **NO IS THE PRO-ENVIRONMENT VOTE**.

29. USMCA TRADE DEAL

House Majority Leader Steny Hoyer (D-MD) sponsored H.R. 5430, the United States-Mexico-Canada Agreement Implementation Act (USMCA), which ratified President Trump's trade deal that fails to even mention, let alone take action on, the climate crisis. The deal threatens our climate and communities by continuing to support fossil fuel development, including dirty tar sands oil and fracked natural gas, and allowing oil and gas companies in Mexico to challenge environmental and climate regulations through the Investor-State Dispute Settlement system, all while failing to recommit the U.S. to the Paris Climate Agreement. Additionally, the deal falls far short on what is necessary to significantly strengthen enforcement mechanisms, protect against illegal flora and fauna trade, or address outsourcing and dumping of toxic pollution into air and water. Ultimately, the final agreement helps corporate polluters and wastes a critical opportunity to address the climate crisis and environmental issues created by international trade. On December 19, the House approved H.R. 5430 by a vote of 385-41 (House roll call vote 701). NO IS THE PRO-ENVIRONMENT VOTE. The Senate approved H.R. 5430 on January 16, 2020 and President Trump signed it into law on January 29, 2020.

^{*} Representative Radewagen, as a Delegate, is only eligible for floor votes taken in the Committee of the Whole.

** Representative Kirkpatrick entered statements into the Congressional Record noting how she would have voted on roll call votes 372, 381, 382, 383, 384, 385, 390, and 395, which would have been scored as pro-environment. She was absent for those votes due to a family emergency.

Representative Sherman entered a statement into the Congressional Record noting how he would have voted on roll call vote 240, which would have been scored as pro-environment. He was recorded as not voting due to being needed in the district.

Representative Porter entered statements into the Congressional Record noting how she would have voted on roll call votes 634 and 654, which would have been scored as

representative Rouda entered statements into the Congressional Record noting how as would have voted on roll call votes 0.54 and 184, which would have been scored as pro-environment. He was recorded as not voting for these votes due to a family commitment. Representative Hunter was recorded as not voting on roll call votes 654, 666, and 701, because Congressional rules prevent those convicted of a serious crime from voting. He pleaded guilty on December 3, 2019, to charges he used campaign funds for personal expenses and resigned on January 13, 2020.

Representative Vargas entered statements into the Congressional Record noting how he would have voted on roll call votes 175, 181, and 184, which would have been scored as pro-environment. He was absent due to an important and unmovable family obligation.
 Representative Larson entered a statement into the Congressional Record noting how he would have voted on roll call vote 654, which would have been scored as pro-environment. He was absent for this vote due to attending a funeral.
 Representative Holmes Norton, as a Delegate, is only eligible for floor votes taken in the Committee of the Whole.

^{*} Representative Sanford Bishop was absent for roll call vote 634 due to a family issue.

** Representative Lewis entered a statement into the Congressional Record noting how he would have voted on roll call vote 634, which would have been scored as pro-environment. Representative Hice entered a statement into the Congressional Record noting how he would have voted on 597, 602, and 609, which would have been anti-environment. He was absent for those votes due to the death of his father.

‡ Representative San Nicolas, as a Delegate, is only eligible for floor votes taken in the Committee of the Whole.

Representative Katko entered a statement into the Congressional Record noting how he would have voted on roll call vote 95, which would have been scored as pro-environment.

Representative Chris Collins resigned on September 30, 2019, and pleaded guilty on October 1, 2019 to conspiracy to commit securities fraud and lying to federal investigators.

Representative Bishop was sworn in on September 17, 2019, after winning a special election following the death of Representative Walter Jones February 10, 2019.

Representative Bishop was sworn in on September 17, 2019.

Representative Adams entered statements into the Congressional Record noting how she would have voted on roll call votes 175, 181 and 184, which would have been scored as pro-environment. She was absent for these votes due to a tragic school shooting event in her district.

Representative Sablan, as a Delegate, is only eligible for floor votes taken in the Committee of the Whole.

Representative Plaskett, as a Delegate, is only eligible for floor votes taken in the Committee of the Whole.
 Representative McEachin entered statements into the Congressional Record noting how he would have voted on roll call votes 521, 525, 530, 597, 602, and 609, which would have been scored as pro-environment. He was absent for those votes due to a medical procedure.
